

About Me

I am a software developer with 2 years of experience, specializing in backend web development and additional experience in frontend and mobile development. Passionate about continuous learning, I strive to stay ahead of the curve. Currently, I am focused on integrating AI into existing systems.

Experience

AppWorks 2024 -

Software developer
Creating and maintaining products with a focus on backend development, while also contributing to frontend work. Currently involved in training and integrating AI models into existing systems.

Testronic 2024-2024

QA Technician
Gained QA experience to understand software development and its lifecycle, using tools like Jira, TestRail, and unit testing frameworks.

ITMentorstva 2023-2024

Software Developer (Intern)
Interned to enhance an e-learning platform under a senior developer's guidance, improving my skills with the Laravel framework.

Enon Solutions 2023 - 2023

Software Developer (Intern)
Full-stack internship focusing on frontend fundamentals with Vue.js and Node.js, awarded for outstanding academic performance.

Engoo 2018 - 2022

English Teacher
Worked as an online English teacher for 4 years during my studies to support myself financially while pursuing academics.

Education

2022-2023
ITAcademy
Native Android Development

2018-2022
Faculty Of Political Sciences
Social Work And Social Politics

After college, I left my job to focus fully on advancing my software development skills, dedicating all my time and effort to the field.

Bachelor's degree in Social Work and Social Politics, driven by a strong interest in human psychology and behavior patterns.
