[Portfolio](#)

PROFILE

Experienced Software Developer with 4 Years of Proven Success in Designing, Building, and Maintaining Complex Systems. Primarily Backend-Oriented, with Strong Frontend Capabilities When Needed. Specialized in Integrating AI into Existing Architectures and Developing Scalable AI Aggregation Solutions

WORK EXPERIENCE

2023 -

AppWorks, Belgrade

Software Developer

- Developed robust backend systems for leading Serbian clients using Laravel, Flask, and FastAPI.
- Built and launched AI-first products, including transcription tools and custom-trained models.
- Integrated AI features into legacy systems, improving automation and efficiency.
- Designed and maintained system architecture across all projects, ensuring clean, scalable codebases.

2021-2023

ITMentorstva, Remote

Software Developer

- Developed backend systems using Laravel, with a focus on SOLID principles and performance.
- Designed and deployed relational database schemas to support scalable application logic.
- Maintained and improved existing codebases across multiple production environments.
- Contributed to one of Serbia's leading educational platforms, delivering stable and user-focused backend solutions.

2020-2021

Enon Solution, Belgrade

Software Developer - Intern

- Built web applications using Vue.js and Node.js as part of a full-stack workflow.
- Gained hands-on experience with relational databases and data modeling.
- Explored fundamentals of 2D animations.
